

SUMMARY

Product-driven software engineer with a background in cryptography and a proven track record of developing streamlined web applications. Quick to master complex business requirements and translate them into technical solutions. Collaborative team player focused on delivering detail-oriented applications.

EXPERIENCE

- **EQT Group** Stockholm, Sweden
Fullstack Developer Intern Feb 2025 – June 2025
 - Collaborated with cross-functional teams including data/AI engineers and product designers, to develop new features for the internal web platform.
 - Actively contributed to agile development cycles by resolving 40+ tickets and involving in technical discussions around platform architecture and scalability.
 - Developed AI-powered features using MCP (Model Context Protocol) and other machine learning integrations, enhancing the platform's intelligent investment analysis capabilities.
- **Individual Developer** Stockholm, Sweden
Software Engineer Oct 2022 – Present
 - Collaborate with people from diverse backgrounds to translate perspectives into technical products.
 - More about my projects: www.chengdai.dev
- **Beckers Group** Shanghai, China
Data Migration Consultant Dec 2021 – Feb 2022
 - Coordinated a major data migration of 100+ employees from IBM Lotus Notes to Microsoft Office 365.
 - Served as the primary liaison between the Shanghai office and the Stockholm headquarters, ensuring seamless communication.
- **FangSuo Group** Shanghai, China
IT & Operations Manager July 2021 – April 2022
 - Managed membership databases and event ticketing systems for an independent bookstore.
 - Organized cultural events in collaboration with universities, local companies, and community leaders.
- **Sugon** Qingdao, China
Project Coordinator May 2019 – Feb 2020
 - Coordinated project timelines and facilitated communication between team members and healthcare professionals, ensuring smooth collaboration.
 - Assisted in data gathering and analysis to support the implementation of machine learning algorithms.

SKILLS

- **Programming Languages:** TypeScript, Python, SQL, GraphQL
- **Technologies:** React, Next.js, Node.js, PWA, Astro, Chrome extension, PostgreSQL, Prisma, GCP, Docker

EDUCATION

- **Massey University** Auckland, New Zealand
Master of Science in Information Technology Partial completion (2020–2021)
- **Information Engineering University** China
Bachelor of Science in Cryptography 2012 – 2016
